## SUMMER 2026

PUBLIC SAFETY

TEST DRIVE YOUR FUTURE

CARPENTRY

MARINE SCIENCE

ESPORTS

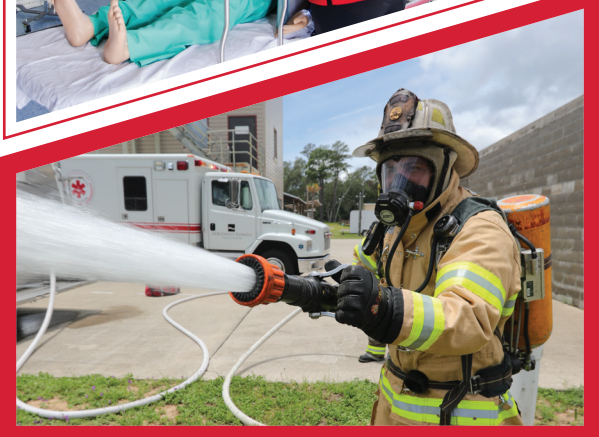

ARTIFICIAL INTELLIGENCE (AI)

CYBERSECURITY

3D PRINTING

SCRUBS CAMP

(includes Nursing, Radiography,  
Medical Lab Technology, and Physical Therapy)

Session 1

**June 8 - 11**

Session 2

**June 15 - 18**

**Sessions are Monday - Thursday**

**9:00 a.m. - 12:00 p.m.**

For 8th through 12th grade students.  
High-impact hands-on training in  
Career & Technical Education fields.

**Limited Spaces Available, Register Today!**

**\$100.00 per camp**

# Course Descriptions

**Session One: June 8 – 11**

**IMPORTANT:** There are **four** different summer camp locations. Please review the **location** and **date** of your selected camp before registering.

## **3D Printing** *Niceville Campus*

What your mind can imagine, a 3D Printer can make! If you want to visualize and create a graphic design using the 3D modeling CAD program and bring your virtual three-dimensional design to life with a 3D printer, then this is the perfect course for you! You will watch your actual digital creation come to life as each layer is laid down. This interactive course will give you the opportunity to gain a deeper understanding of 3D graphic design which can lead to a variety of careers including video game designer, graphic designer, 3D animator, and architectural designer. Build your 3D skills and obtain a great introduction to this fast-growing field of technology and design. You will model and create objects in a 3D design program, learn about the many diverse types of 3D printing, and take home your own 3D printed art.

## **Artificial Intelligence (AI)** *Niceville Campus*

Do you have what it takes to defend and protect your data and resources against a cyber attack? In this course you will use Artificial Intelligence tools and cybersecurity skills to identify harmful intrusions and eliminate them from your network. You will learn how to configure your firewall and malware settings to successfully mitigate phishing, denial of service, man-in-the middle and other techniques commonly used by hackers. This course will use virtual reality to provide a real-world virtual environment to practice the skills you learn in this course. If you are ready to be a leader in the battle against cyber attacks, this course is for you.

## **Carpentry** *DeFuniak Springs Campus*

Carpenters participate in many diverse kinds of construction, from the building of highways and bridges to the installation of kitchen cabinets. This course helps prepare students for a career in the building trades through a combination of classroom theory and hands-on experience. Students gain experience using hand tools, portable power tools, and other construction equipment commonly used in carpentry. At the end of the session, students build a bird house and take home a new tape measure and safety goggles!

## **Esports: Overwatch** *Niceville Campus*

**Please Note Ratings:** ESRB: Teen 13+, PEGI: 12+, Common Sense Media: 13+

Are you interested in attending a game-based summer camp? Students attending this exciting camp will receive Professional Top 500 coaching for *Overwatch*. *Overwatch* is a critically acclaimed team-based, hero shooter game set in an optimistic future with an evolving roster of over 40 diverse heroes, each with unique abilities and roles that help complete the mission objectives. You and your team will work to complete the mission objectives in every match. The objective of this camp is to teach students: 1) Fundamentals of the game, 2) How to join teams, 3) Ranking up, 4) How to practice, and 5) Mindset to improve. Even if you have never played *Overwatch*, you will receive live personal coaching that will allow you to leave camp with the basic skills to level up your game!

# Course Descriptions

## Session One: June 8 – 11 (cont.)

**IMPORTANT:** There are **four** different summer camp locations.

Please review the **location** and **date** of your selected camp before registering.

### Scrubs

**Includes: Nursing, Radiography, Medical Lab Technology, and Physical Therapy**  
*Fort Walton Beach Campus*

Do you want to make a difference in people's lives? Are you interested in a career in Health Sciences? Then we need you to join us for Scrubs Camp! Students attending this camp will engage in hands-on learning experiences, and upon completion will have a better understanding of how multiple healthcare professionals engage with a patient to make their life better. Students learn the role and importance of each member of the health care team:

- Explore the critical care provided by Nurses and the role they play in positive patient outcomes.
- See how imaging is collected through Radiography and how it's used as a key diagnostic tool for many diseases.
- Learn how Medical Laboratory Technologists analyze samples and provide results for doctors to identify and treat disease.
- Experience how Physical Therapist Assistants help patients regain strength and independence and improve their quality of life.

Explore the tools and equipment used in each of these healthcare fields. Our desire is for students to expand their knowledge of the health sciences and use this experience as a catalyst for a future career in health care.

## Session Two: June 15 – 18

**IMPORTANT:** There are **four** different summer camp locations.

Please review the **location** and **date** of your selected camp before registering.

### 3D Printing

*Niceville Campus*

What your mind can imagine, a 3D Printer can make! If you want to visualize and create a graphic design using the 3D modeling CAD program and bring your virtual three-dimensional design to life with a 3D printer, then this is the perfect course for you! You will watch your actual digital creation come to life as each layer is laid down. This interactive course will give you the opportunity to gain a deeper understanding of 3D graphic design which can lead to a variety of careers including video game designer, graphic designer, 3D animator, and architectural designer. Build your 3D skills and obtain a great introduction to this fast-growing field of technology and design. You will model and create objects in a 3D design program, learn about the many diverse types of 3D printing, and take home your own 3D printed art.

### Cybersecurity

*Niceville Campus*

In this eye-opening course, students learn basic cybersecurity skills and gain hands-on experience putting those skills into practice. This course covers methods for protecting resources and privacy when using passwords, email, social media, text messaging, and phone sharing. Students get the opportunity to test out the role of cybersecurity analyst as they learn how to evaluate applications and websites to determine if they safeguard their data. This course includes discussions, games, group exercises, and computer-based learning.

Even if you have never played *Overwatch*, you will receive live personal coaching that will allow you to leave camp with the basic skills to level up your game!

### **Marine Science: The Underwater World** *Niceville Campus*

Would you like to explore the exciting world of marine science, including oceanography and marine biology? This camp introduces participants to ocean exploration, oceanography, and marine biology using hands-on activities. Students will investigate sea turtle biology and ecology, cetacean (whale and dolphin) biology, local oyster biology, and fisheries science—gaining a deeper understanding of coastal ecosystems.

### **Public Safety Camp** **Explore: Emergency Medical Services, Law Enforcement, and Firefighting** *Niceville Campus*

Students will be introduced to Emergency Medical Services, Law Enforcement, and Firefighter concepts and skills. This will include Emergency medical interventions, Law Enforcement tactics, and Firefighting methods. Our desire is to provide the students with a broad overview of different aspects of each discipline that is offered through the Northwest Florida Public Safety Training Center. Students will also participate in activities that are common to the public safety and first responders' field, including, but not limited to, Emergency Medical Services lab activities; Law Enforcement Defensive Tactical activities, Firefighting training activities, all with the use of training gear and equipment. Students will experience the exciting and very rewarding in-depth session to learn if public safety and serving their community is in their future!

### **Scrubs** **Explore: Nursing, Radiography, Medical Lab Technology, and Physical Therapy** *Fort Walton Beach Campus*

Do you want to make a difference in people's lives? Are you interested in a career in Health Sciences? Then we need you to join us for Scrubs Camp! ### Test Drive Your Future

**Explore: Artificial Intelligence, Nursing, Physical Therapy Assistant, and Marine Science**

*South Walton Campus – **NEW***

Do you want to discover your interests and start planning your future — before you even graduate high school? This camp gives you the chance to “test drive” four exciting, unique career fields: artificial intelligence, nursing, physical therapy assistant, and marine science including waterway protection and restoration.

You won't just hear about these careers — you'll use real equipment, take part in hands-on activities, and learn directly from industry professionals what each field is really like. It's your opportunity to explore new possibilities, discover what excites you, and take the first step toward your future.
